

Biomax 5

Microbial Inoculant for Corn Silage.

Biomax 5 microbial inoculant offers superior performance for corn silage preservation.

- Controls and directs fermentation
- Extends aerobic stability of the silage
- Produces an anti microbial compound
- Inhibits 5 major spoilage yeasts
- Produces lactic acid, known to prohibit molds
- Quickly lowers pH
- Proven effective in university and field trials on different hybrids, under different harvest and storage conditions
- Available in dry or water soluble formulations
